**EVENLY SATURATES** LINER WITH RESIN TO **PREVENT WASTE**

**COMPACT SIZE** FITS ON YOUR TRUCK AND IS **JOBSITE FRIENDLY**

**ARMOR**  
PIPE LINING SOLUTIONS

# CALIBRATION UNIT MICRO

FOR PRECISE CALIBRATION OF RESIN IMPREGNATED LINERS

## PRECISION FOR THE PROS.

The Armor® Calibration Unit Micro up to 8" is a comfortable, user-friendly solution in a new design. The smallest version features low weight, cost-optimized design and manual calibration without electrical components.

The roller spacing, which determines the wall thickness in the result of the rehabilitation, can be defined on the top of the unit with a handle. The pull-through speed is determined by the rotation speed of the handwheel or a cordless screwdriver. Rubber feet at the bottom always ensure that the unit remains in an optimal position. **The micro impregnation system offers a manual yet precise impregnation combined with a minimum weight.**

| KEY FEATURES             |  |
